

SLUG CATCHERS

# BUILT FOR INTEGRITY AND EASY INSTALLATION

When it comes to protecting your plant and process from pipeline slugs, don't settle for field-constructed equipment. Take control of phase management with a flexibly designed, field-ready slug catcher from WeldFit.

When you specify a WeldFit slug catcher, you get high-performance phase management equipment made by specialists, built to exacting standards and engineered for modularity to streamline deployment in the field. Because from the pipeline to the plant, making sure your facility has the best system for the job is how WeldFit works.

Standard designs available with options from CFD modeling to expandable systems and other add-ons upon request. **Reach out to your WeldFit representative to learn more.**

# FIELD-READY FLEXIBILITY

Let WeldFit's engineers and technical specialists design and build a system that perfectly balances your application's efficiency, capacity and economic demands. Whether made with extruded outlets, contoured outlets or standard tees and fittings, our team works with you to deliver a system that meets code, makes sense and delivers confidence—all with the highest level of reliability you've come to expect in a WeldFit system.

CFD model visual analysis assures design integrity.

## MORE VALUE / SMART DESIGN

01

### FLEXIBILITY

Choose from WeldFit's standard designs or have one customized for the application at hand by highly experienced flow management specialists who understand the demands of facilities like yours.

04

### MODULARITY

From fitting-to-pipe welds to options for skid-mounting and custom connections, WeldFit lets you design and buy for streamlined installation and commissioning in the field.

02

### CFD MODELING

WeldFit's team of experts can employ Computational Fluid Dynamics (CFD) modeling to diagnose and solve issues on your current slug catcher or to provide a process guarantee on our slug catcher.

05

### SCALABILITY

WeldFit has the resources to fulfill large orders for multiple pieces and types of equipment, and prides itself on giving you turnaround times that help reduce project stress and risk.

03

### EFFICIENCY

Our team and facilities work with you to ensure that not only is the equipment efficient, but so is the process of specifying, ordering and project coordination.

06

### CAPACITY

We can also engineer and manufacture high-capacity systems with ANSI 600# ratings, liquid volumes up to 50,000BBL and gas volumes up to 1BCFD.

### EXTRUSION EXPERTISE

Option to eliminate girth welds in the field

### PRODUCT PACKAGES

Order in conjunction with SureLaunch® system

### LIQUID OR GAS

Our service capable for most slug catcher separation systems

### SAFETY PERFORMANCE

Built to any applicable safety factor
