

WELDFIT™

/ FLOW ASSURANCE

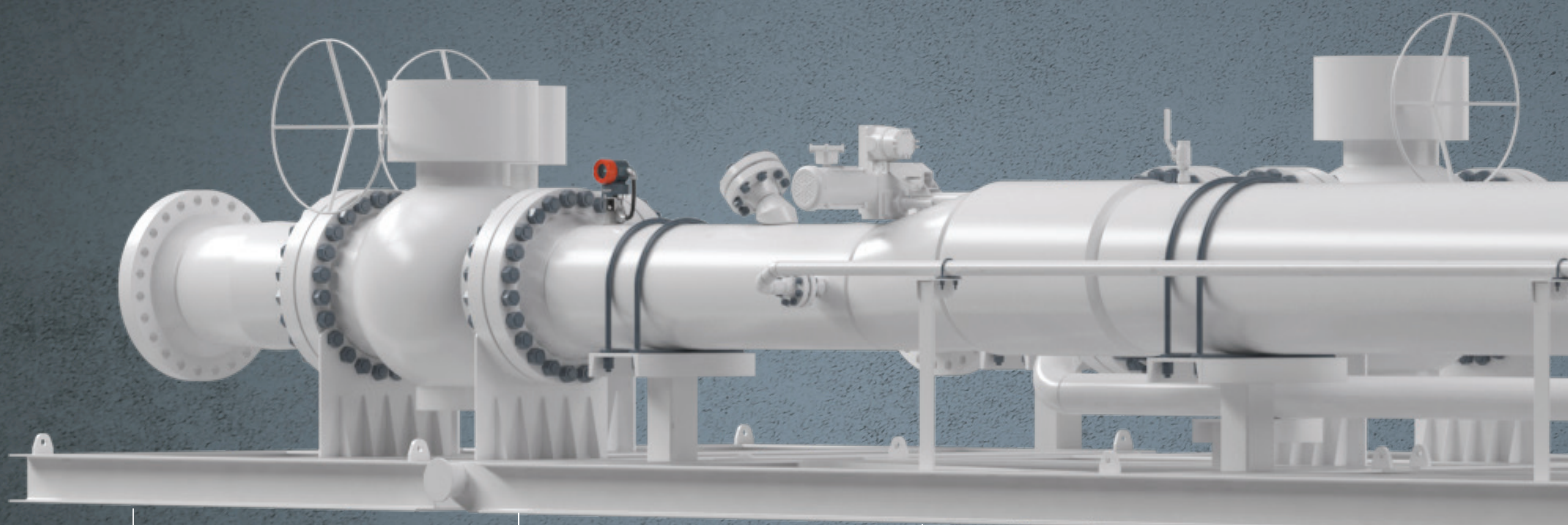

Pipeline Launcher & Receiver Systems • Pipeline Pigs • Pipeline Pigging Services

Innovation • Efficiency • Reliability • Safety

Merge Efficiency with Reliability to Deliver Safety and Savings.

WeldFit is one of the world's leading providers of pipeline pigging technologies. From the SureLaunch® multi-pig launching system with fully integrated automation to advanced essentials such as quick-opening closures, we're constantly innovating to push the potential of hydrocarbon infrastructure productivity.

01

LONGER ASSET LIFE

Fewer openings and closings extend valve service life and reduce maintenance costs.

02

PROTECT CREWS AND THE ENVIRONMENT

Eliminates repeated depressurizations and openings and reduces methane emissions to a fraction of those from single-pig systems.

03

MAXIMIZE PRODUCTIVITY

Multi-pig capacity means pigging technicians load seven to 10 pigs at one time and the system does the rest.

THE **SUR** MULTI-PI

With more units in the standard in streamlin safer for technicians t remote, or hard-to-rea fingertips.

04

**EASIER
PIG HANDLING**

Patented horizontal design brings pig-loading and unloading to a safer, more efficient level.

05

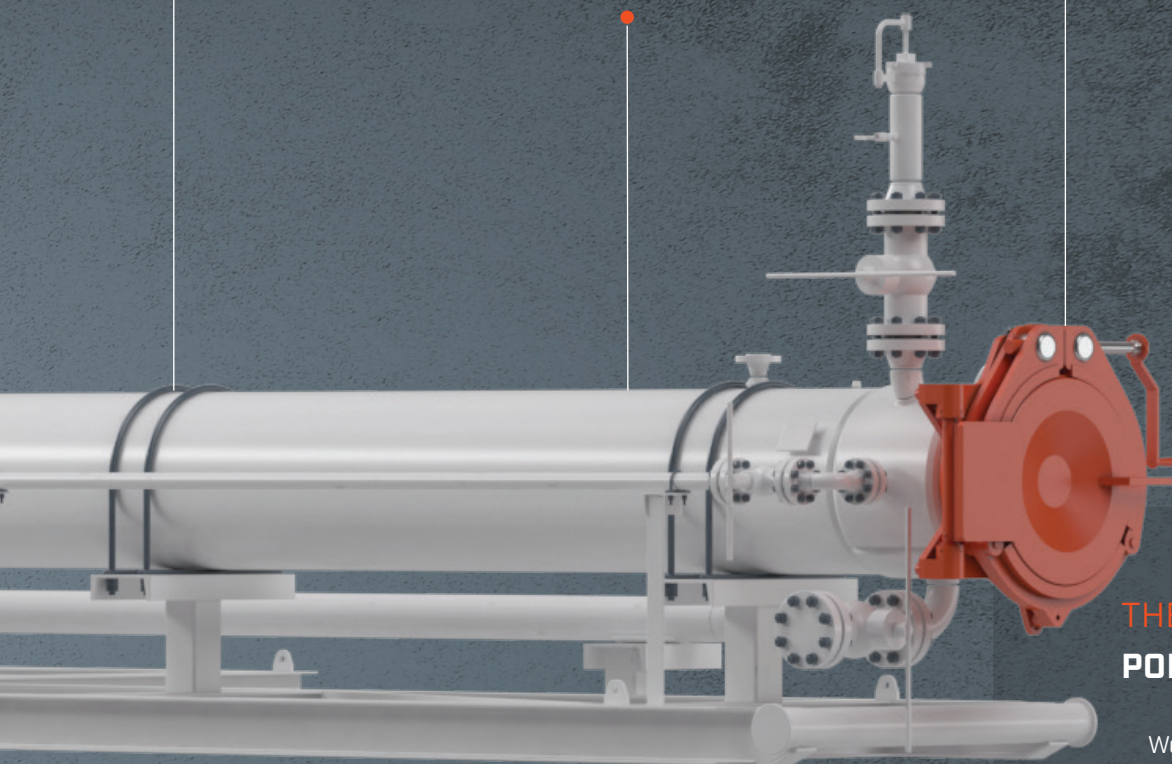

**ILI TOOL
COMPATIBILITY**

Kicker line and in-line inspection (ILI) Pull Port provide the flexibility to load and launch ILI tools using the kicker line in manual mode.

06

**LOWER
OPERATING COSTS**

Eliminate significant travel time and crew requirements, improving crew utilization.

**THE SURELAUNCH® PIG
PORTFOLIO**

WeldFit offers a range of solid cast urethane pigs including cup type and disc type options. Available in sizes 6" to 30" for a variety of applications.

- / HIGH QUALITY URETHANE
- / RELIABLE & INNOVATIVE DESIGNS
- / SOLID CAST FOR DURABILITY

**SURELAUNCH®
PIG LAUNCHING SYSTEM**

Compared to any other automated pigging system, SureLaunch® sets the industry standard for pigging operations. Its horizontal design makes it easier, more efficient, and allows to load and launch 7 to 10 pigs at predetermined intervals in even the most rugged, remote locations. And its PLC puts control and information at your technicians'

Built for Pigging Automation

The SureLaunch® pig (SLp) is a high-performance, single-piece pipeline pig engineered from premium-grade, abrasion- and chemical-resistant polyurethane. Designed for durability and reliability, the SLp delivers extended service life in demanding pipeline environments. While versatile across a wide range of applications, the SLp is optimized for multi-pig launching systems, incorporating patent-pending design innovations that eliminate the need for backing plates or additional components. Its three-cup configuration ensures a full-wall seal, enabling superior liquid removal in wet gas systems and effective mitigation of paraffin and debris buildup in crude oil pipelines. Available in 6" to 30" diameters, the SLp is ideal for batching, commissioning, product evacuation and hydrostatic testing—making it a go-to solution for operators seeking efficiency, reliability and operational simplicity.

STACKABLE LAUNCHING: Simplified, integrated design enables indexed launching in multi-pig systems without the risk of sticking or lodging—no backing plates removes the need for nuts and bolts, eliminating the chance of loose parts getting lost in the pipeline.

ADVANCED URETHANE COMPOSITION: High-strength, chemical-resistant 80A durometer material ensures exceptional wear resistance and longevity.

ADAPTIVE CUP GEOMETRY: Flexible cups navigate pipe deformations such as buckles, dents, and ovalities with ease.

TIGHT RADIUS NAVIGATION: Engineered to traverse short-radius bends and varying internal pipe diameters without compromising seal integrity.

FULL-WALL SEALING: Cup design maintains a continuous seal through tees, check valves, and full-opening valves for optimal cleaning and separation.

EXPANDABLE HOLLOW CORE: Expands under pressure to enhance sealing performance and can house transmitters for real-time pig tracking.

SureLaunch pig

High-Quality Manual Pigging Systems that Keep Pipelines Running

The WeldFit SureTrap® traditional pigging system helps make manual pigging as productive as possible. A workhorse in the field, this system brings superior strength and reliability to your pigging program. Proven in the field for decades, the SureTrap system offers ease of use and superior performance at the same time. All with the exacting QA/QC standards and precision manufacturing you've come to expect from WeldFit.

01

OVERSIZED

barrels for easier pig handling and loading

02

MODULARIZED

skid-mounted options for easy field installation

03

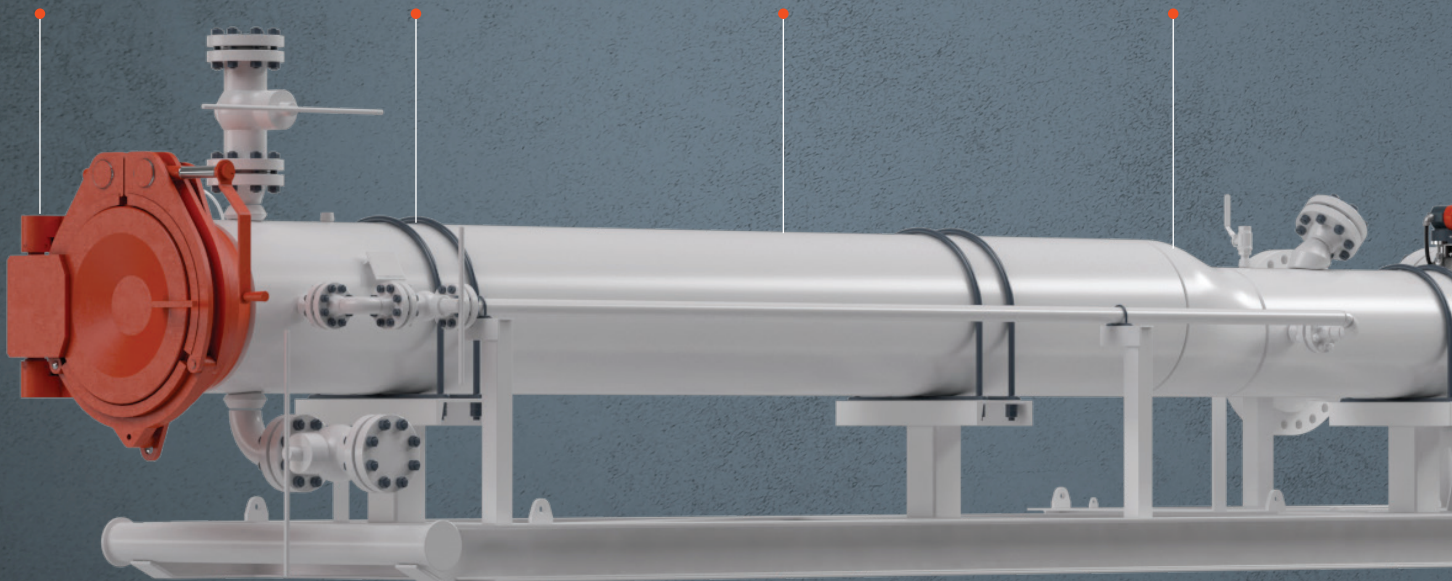

FLEXIBLE

designs that let you configure everything where you want it

04

ILI PULL PORTS

available for inspection tool launching

EMISSIONLESS PIGGING

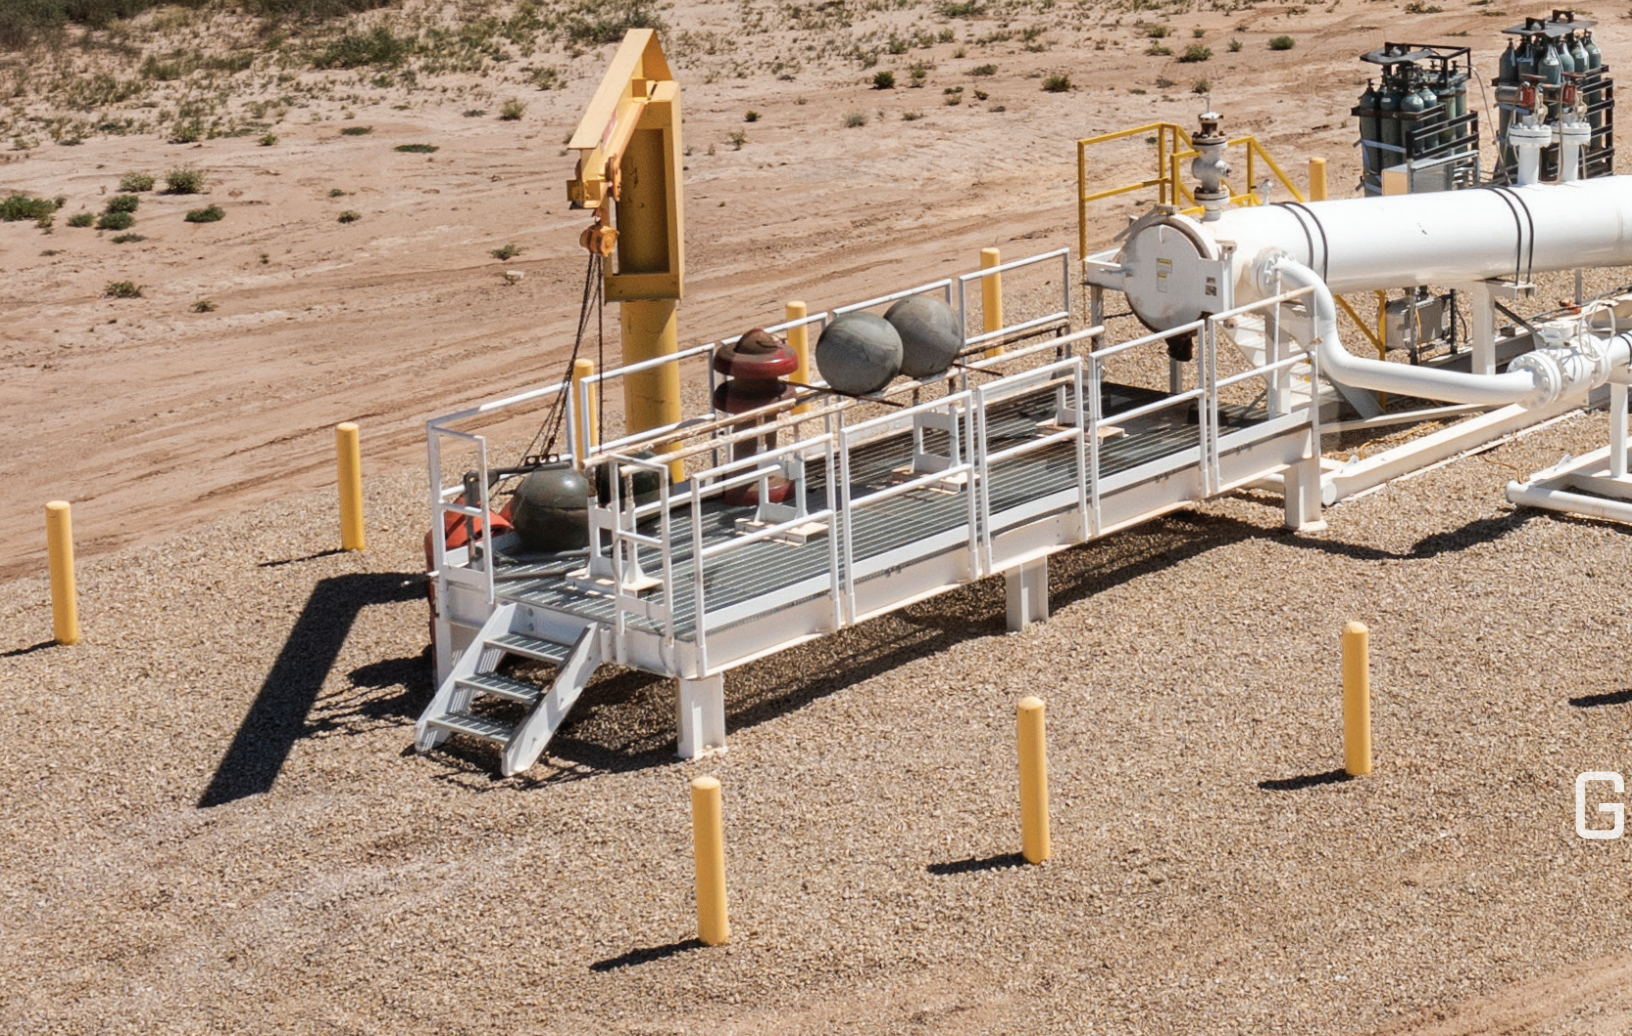

Make your pigging program nearly 100% environmentally friendly with WeldFit's **ReCAP® Emissions Recovery System**. A safe alternative to venting and flaring, ReCAP's cross compression functionality depressurizes and transfers gas from the isolated pigging system to the live pipeline ahead of pig loading and unloading events.

- / IMPROVED TEAM SAFETY
- / PRESERVED PRODUCT IN THE LINE
- / RELIABLE, USER FRIENDLY OPERATION

ReCAP Emissions Recovery

Combine Gravity with Auto Optimize Your Pigging Pro

Reliable as Gravity Itself...

WeldFit's sloped, gravity-fed multi-pig launcher systems are simple to use and engineered with everything you need to operate your wet gas pigging program on a highly tuned schedule.

Standard units hold 10 spherical pigs in sizes up to 12" and eight spherical pigs in sizes 16" and larger. Options include elevated platforms to ease loading and operation. Our control system utilizes a PLC with an HMI in an explosion proof housing mounted in an easily accessible area on the launcher skid. Our standard launch pins are electric, which eliminates the need for supply gas required for pneumatic pins.

Program.

Gravity-Fed Spherical Pig Launchers & Receivers

- / REDUCED EXPOSURE TO SAFETY RISKS.
- / ADVANCED ENGINEERING FROM SPECIALISTS IN AUTOMATED PIGGING SYSTEMS.
- / REDUCED EMISSIONS AS PART OF YOUR EMISSIONS REDUCTION PROGRAM.
- / OPEX COST SAVINGS THROUGH MORE EFFICIENT USE OF MANPOWER.
- / FEWER VALVE CYCLING OPERATIONS REDUCES MAINTENANCE COSTS.

Assure Predictability and Peace of Mind.

Considering all the critical integrity tasks your pigging equipment performs, there's no time for downtime. To keep your SureLaunch® Multi-Pig Launching System running at factory-level reliability, turn to WeldFit's Pigging Services. Qualified and field-trained, WeldFit's technicians are the subject matter experts on SureLaunch, from the internals to the automation system.

No one knows more about putting your SureLaunch through its paces or is better equipped to provide preventative maintenance and repair. For more information, contact your WeldFit representative.

Pipeline
Pigging Services

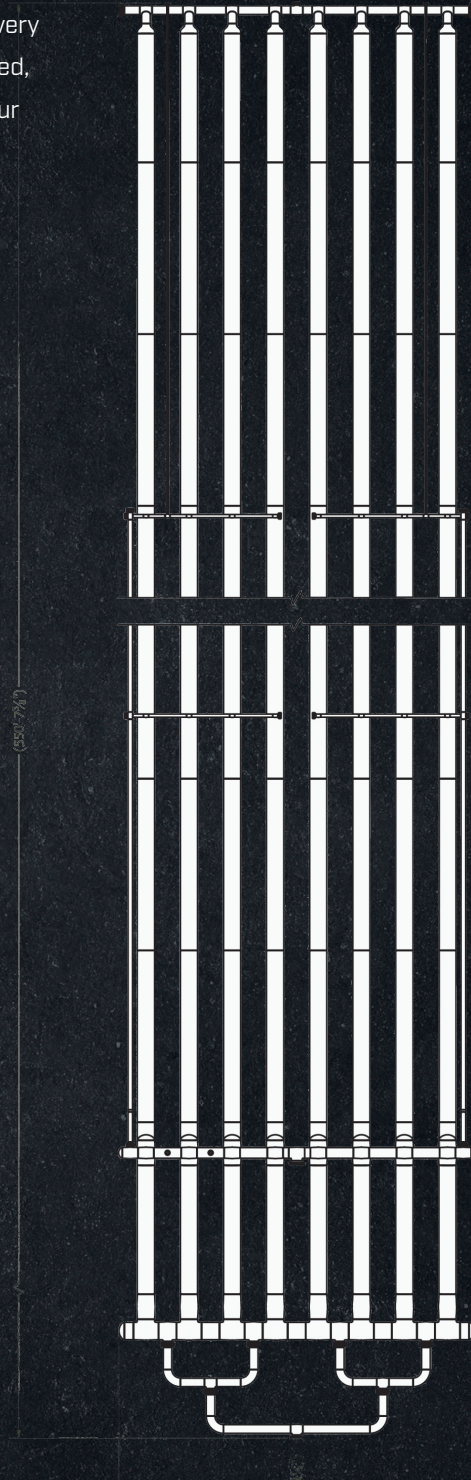

Designed & Built for Integrity and Easy Installation.

Our high-performance slug catchers are engineered to make liquids recovery and management more effective—which means more productivity. Designed, engineered, fabricated and tested, our slug catchers perfectly balance your application's efficiency, capacity, and economic demands.

- / MODULAR DESIGNS FOR STREAMLINED INSTALLATION
- / STANDARD OR CUSTOM DESIGNS FOR ANY APPLICATION
- / HIGH-CAPACITY SYSTEMS UP TO 50,000 BBL & 1 BCFO
- / SLUDGE MANAGEMENT SOLUTIONS AVAILABLE
- / MANUFACTURING IN ACCORDANCE WITH RIGOROUS QUALITY STANDARDS
- / CFD MODELING AVAILABLE

LEARN how our slug catchers and SureLaunch Multi-Pig Launching System work together to manage liquid slugs and optimize your CAPEX spend. Contact your WeldFit representative today.
